

Tri Star Metals

Delivering Stainless, Aluminum & Nickel Solutions

Team TSM,

It is my great pleasure to announce that Matt Perry has been promoted to VP of Quality and Product development. Eight years ago this month, Matt walked through the doors in Freeport as a Process Engineer. At that time, we were struggling with a move, loads of new equipment and issues with our CHQ and Aerospace programs. During the last 8 years, all our teams have work diligently to improve our quality, efficiency, and processes. And just as important, we also attained our AS9100 certification. Matt was a key member and leader in achieving the progress and success we have enjoyed. Last year alone, our Aerospace business grew by 45% & CHQ over 20% in terms of pounds. We have come a long way during his tenure.

Matt has and continues to be a strong champion of TSM, our people, and customers. Please join me in congratulating him on a promotion that is well deserved!

Jay Mandel
